GeoPortti is a service aimed for students and teachers who use geospatial data and geospatial tools. In GeoPortti, it is possible to browse datasets and providers, both Finnish and international. The service also has information about geospatial tools and education.

1) Follow the link: <http://www.geoportti.fi/>. If you want to browse data services, click Data -> Find & get data.

2) You can now browse different services on a new page.

3) There are also other options on the front page. You can freely browse these pages.

By clicking Data, you can browse and upload your datasets, Tools lead you to many sections that are for example list of geospatial software, Community has information about news and networks, Skills Development has many sections such as online-learning and self evaluations.
