Helsinki Region Infoshare (HRI) is a service that provides data about Helsinki Metropolitan cities. The data published is mainly statistical but there is also a proportion of geospatial data in HRI. The data is about

- Economics
- Population
- Welfare

There are also examples how the data has been used in the HRI showcase gallery.

1) Follow the link: [https://hri.fi/en\\_gb/](https://hri.fi/en_gb/). Click Data -> Search data

2) Filter results from the left side bar. Choose for example SHP to see only Shapefiles.

3) Choose the data package you wish to download, for example HSL's city bicycle stations.

4) If you want your data package to be in Shapefile, press the corresponding Download-button.
