

DIGITAL TOOLS FOR TEACHING

The teacher needs digital tools for

- planning teaching
- teaching
- guiding
- evaluation
- interacting and networking
- information retrieval and data management
- orientation and activation
- supporting thinking
- summaries and analyses
- searching, providing and producing digital learning materials
- for learning new things etc.

The basis for selecting digital tools are

- pedagogical needs
- what tools does the educational institution provides
- what tools does the educational institution supports
- the level of skills - what tools does the students and teachers know how to use
- licenses and the age of the students
- data and internet security
- tools in use - all students have to have access to programs, and they have to be able to use their own devices
- starting with small steps - solutions that support learning
