# DIGITAL TOOLS FOR STUDYING

The student needs digital tools for
- planning the studies
- studying
- tutoring
- presenting skills
- evaluation
- networking and interacting
- retrieving and managing information
- auxiliary to thinking
- summaries and analyses

The basis of digital tools
- what tools does the educational institution provide
- what tools does the educational institution support
- the level of skills - what tools does the students know how to use
- data and internet security
- equipment in use - all students have to have access to programs, and they have to be able to use their own devices
- starting with small steps - solutions that support learning
